

JOURNAL OF PUBLIC HEALTH INNOVATION

Jurnal kesehatan masyarakat atau Journal of Public Health Inovation (E-ISSN 2775-1155) is a journal under the auspices of the STIKES Kuningan institution and managed in the Public Health Study Program with the hope that the existence of JPHI can provide changes in society and new innovations in health sciences with high mobilization of knowledge, skills and experience from research days. JPHI is a Public Health Journal or Journal of Public Health Innovation (JPHI) is a journal under the auspices of the STIKES Kuningan institution and managed in the Public Health Study Program with the hope that the existence of JPHI can provide changes and innovations in scientific works throughout Indonesia. JPHI was first established in 2019 which will be published twice a year following the publication of the STIKKU journal. Presented in a language that is easily understood by the public so that the Journal of Public Health Innovation will later be most often read by doctors and health experts as reading material and references.
